

# MAKING A DIFFERENCE

## CLIMATE CHANGE POLICY

**Climate change is a critical global challenge, and its human causes must be addressed by all parts of society.**

**We believe that clean energy, including renewable energy generation, grid-scale energy storage, and the electrification of transport, is central to limiting the human causes of climate change.**

**We believe that clean energy will make the planet a better place for every generation to come.**

### Scope

At IGO, we care about the environment and act on climate change. By 2035, we aspire to be carbon-neutral across all operations and activities.

### Policy Statement

IGO will:

- Support greater use of renewable energy and other cost-effective low-emission technologies, improved energy efficiency, and its application in our operations
- Support an effective binding global agreement on climate change
- Continue to ensure that climate change considerations are part of our planning process and will establish, implement, and maintain documented climate change objectives and targets
- Support a price on carbon and other market mechanisms that drive reduction in greenhouse gas emissions and incentivise innovation
- Engage with our peers, governments, and society to share solutions and participate in the debate required to create effective public policy on climate change
- Help our host communities and equip our operations to adapt to the physical impact of climate change

### Responsibilities

The IGO Board and Executive Leadership have ultimate oversight of climate change management.

All IGO employees and contractors have a shared and personal responsibility to ensure our business activities are managed in accordance with this Policy.
